REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: prior art of record does not describe or suggest applicants' invention set forth in claims 1-10, a semiconductor device wherein a semiconductor layer formed on a first main surface has a first conductivity type and includes a first region for a cell portion and a second region for a terminating portion and the second region is positioned in an outer periphery of the first region, the terminating portion maintaining breakdown voltage by extending a depletion layer relative to an electric field, in conjunction with periodically arranged junction pairs formed in a line from the first region to the second region, in the context of the recited device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shimizaki (U.S. Patent No. 5,831,317) teaches a semiconductor device with a high breakdown voltage that employs an impurity diffusion layer (abstract).
